# Latest Developments

## Jan-Jul 2020

### Discover over 350 New Products

#### HIGHLIGHTS

##### Amino Acids

Side-chain decoration (phenyl, cyclohexyl, bcp)  
New Aspartic Acid protecting groups  
Arginine: mimetics, short Arg derivatives  
Fluorinated amino acids

##### Drug Delivery

Fullerenes for nanotechnology,  
bio/pharma applications, drug delivery

##### Kits

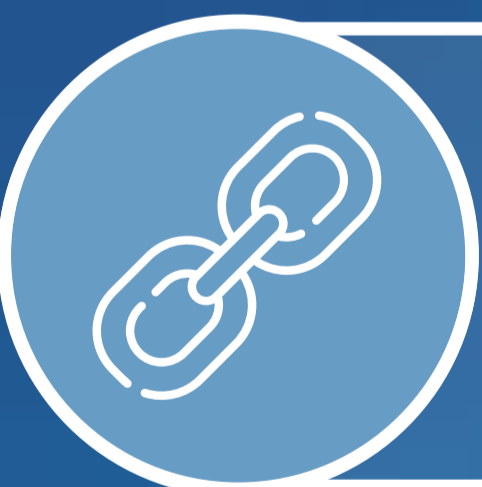

Belyntic's Peptide Easy Clean  
for chromatography-free peptide purification

##### Life Sciences

New Maillard reaction products

##### Linkerology

(Regio-)Selective N-term acylation and biotinylation  
Linkerology: advanced linker technologies, e.g.  
self-immolative disulfide-based linkers
